A Possibility of an Abstraction

A Possibility of an Abstraction is an EMPAC commissioned production that transforms the theatrical space into a field of cinematic experience. It is a play of perception, where shadow, reflection, architecture, and stage become the characters in a filmed experience created in the moment itself. Recalling pre-cinematic traditions of shadow play, and what Ken Jacobs termed paracinema (denoting experimental film practice from the 1960s in which films lacked material or mechanical elements), Kruip creates an atmospheric film-like effect without actually using film, accomplished by manipulating light across the proscenium stage that serves as a stand-in for the screen. Shifting between the cinematic, the theatrical, and the sculptural, A Possibility of an Abstraction creates a meditative space at the edges of our perception with optical illusions and the passage of time.

A Possibility of an Abstraction marks the artist’s renewed engagement with theatrical technology and dramaturgy. After winning the Prix de Rome in 2000, Kruip turned away from scenography to concentrate on visual arts, producing works that brought the theatrical elements of light, temporality, and the stage into a new architectural scale at galleries and museums. Often manipulating daylight with moving geometric sculptures and simple framing devices, her artworks transform the architecture they inhabit, turning each location into a sensual but abstract stage.

Biography
Germaine Kruij

Germaine Kruij’s artworks often take the form of “architectural interventions.” Manipulating daylight with geometric, kinetic sculptures, these interventions transform each site into a stage, with the audience as actors in a play of substantive absence. Kruij’s work has recently been exhibited at Parra & Romero, Madrid, Spain; List Visual Arts Center at MIT, Boston; Stedelijk Museum, Amsterdam, Netherlands; Art Basel 41, Basel, Switzerland; the Approach, London; Museum De Paviljoens, Almere, Netherlands; the Centro Cultural Montehermoso, Vitoria-Gasteiz, Spain; Kunstverein für die Rheinlande und Westfalen, Düsseldorf; the David Roberts Foundation, London; Hiroshima Museum of Contemporary Art, Tokyo; the Drawing Centre, New York, and in the MARZ Gallery, Lisbon, among others.

EMPAC

The Curtis R. Priem Experimental Media and Performing Arts Center (EMPAC) is where the arts, sciences, and technology interact with and influence each other by using the same facilities and technologies, and by breathing the same air.

EMPAC hosts artists and researchers to produce and present new work in a building designed with a sophisticated architectural and technical infrastructure. Four exceptional venues and studios enable audiences, artists, and researchers to inquire, experiment, develop, and experience the ever-changing relationship between ourselves, technology, and the worlds we create around us.
